

GOOD PRACTICE

Schools Sport Facilities' Share

City
Lublin

Country
Poland

Mission
Optimize the use of school sport facilities

Target Group
All citizens

Highlight
A cooperation between the municipality, schools and sport clubs to provide more sport and physical activity opportunities in the existing infrastructure.

Timeframe
01.09 – 20.06, yearly

Budget
No dedicated resources.

The City of Lublin faces an insufficient number of sports facilities that the clubs can benefit from, and the rental cost of infrastructure is high. In order to provide them with extra times, the municipality and the schools of Lublin cooperate for the optimization of the use of the schools' sport facilities.

Every year until July, the schools communicate to the city council the availabilities of their sport facilities for the next year (not less than two hours a day, from Monday to Saturday). The City Department of Sport and Tourism then conducts a call for proposals from clubs (amateur or professional), which can apply for a free grant of „hours“. By August, the City informs the clubs which schools facilities they can use every week, and when.

The clubs provide the schools with a statement ensuring the provision of safety and liability against possible damages.

This system not only optimizes the use of the sport facilities in Lublin; it also reduces the cost for clubs. More than 40 sport clubs representing 900 people benefit from it.
